Please follow the instructions to submit the programming assignment.

1. Archive your work using zip or tar. Should include:
    1. Source code (specify the class which has the main method in readme file)
    2. Required libraries need to compile the source
    3. Additional material required to execute your program. (Such as Pom.xml if your using maven, build.xml for any project)
    4. Add a readme file with instructions how to compile and execute your work.
2. You can upload to your favorite cloud storage (Dropbox, google drive,etc.,) and share the link.

To get an idea how the project structure, please find a sample maven project (SparkExample) at http://github.com/muralipusala

It's not mandatory to submit in maven project for this assignment.
